TECHNOLOGIES AND TOOLS

- HTML, CSS, JavaScript, TypeScript, Python
- React, Next.js, Node.js, Django, FastAPI
- Git, GitHub

SOFT SKILLS

- Collaborative mindset in agile environments
- Strong sense of ownership and reliability
- Analytical approach to problem-solvingCommitted
- Problem Solving

ABOUT ME

Junior Web Developer with a background in Computer Engineering, skilled in building modern web applications using React and Django. Experienced in end-to-end project development — from frontend design to backend APIs and ML integration.

PERSONAL AND ACADEMIC PROJECTS

- **FINAL PROJECT DEGREE**
  Developed a web application to analyze and detect people in videos using a custom Machine Learning model. Built with Django and FastAPI, achieving automated video inference and real-time visualization.

- **PERSONAL WEB PORTFOLIO**
  Designed and deployed a responsive portfolio using React, TypeScript, and TailwindCSS, featuring a modern architecture and CI/CD deployment through Vercel.

EDUCATION

- **Computer Engineering - Software specialty**
  Universitat Politècnica de Catalunya
  2020-2025
